ACCURATE AND SECURE

With a temperature accuracy rate of within 0.2 °C *TempRay®* works in seconds.

The information is stored locally and the system is extremely secure, which minimizes threats to data breach or collection.

With payroll integration, employers can manage staff clocking in and out seamlessly.

PLUG AND PLAY

TempRay® is easy to set up and use. It can be installed in any building entrance and/or added to any access gates or attendance system to allow a safe and efficient access control for staff or visitors.

TempRay® can be wall mounted, floor standing, counter top, or integrated with automatic doors and entry gates and supports ID readers and fingerprint readers.
