Digital innovation you can rely on.

OVER A DECADE OF DIGITAL INGENUITY

UTG Digital Media specializes in innovative indoor and outdoor digital displays and signage. As a leading brand in Canada, our cutting-edge is derived from the fact that UTG proudly designs, develops, and distributes 100% of our quality products. We are committed to providing exceptional products and services to all businesses, big or small. Based in Ottawa, ON, UTG Digital Media has been delivering comprehensive, effective, and exclusive interactive digital solutions to businesses worldwide since 2004.

Wall / Ceiling Mounted

Strategically designed, UTG's full-colour LED displays are state-of-the-art multi-purpose digital solutions that deliver effective advertising campaigns in virtually any public space. Effortlessly promote menu items, sales, and messaging in real time while simultaneously transforming a typically static area into a rich, interactive experience for customers.

UTG's all-in-one digital displays provide a more attractive, sleek, competitive edge because there are no TVs, laptops, media players, or set up boxes required! Reach a larger customer base and enhance high-traffic areas with energy efficient live screen programming, news feeds, and promotions using any format (text, image, flash animation, video, and more).

AVAILABLE SIZES:

12", 15", 17", 19", 21", 23", 27", 32", 42", 47", 55", 65", 70", 84"

Video Wall

As part of UTG's wide range of indoor digital products, our innovative LED video walls are expanding the possibilities for digital signage. Whether used for informational messaging, advertising, or entertainment, our specialized LED video walls completely transform the experience of any audience. Featuring customizable sizing for any venue, UTG's LED video walls can withstand the demands of any environment.

Multiple screens merge together as one to provide flawless, vivid imagery. UTG provides full installation and offers design flexibility to allow for LED video walls of ANY size. The deceptively thin displays blend seamlessly into any surrounding, and guests will never know that it isn't just one screen!

AVAILABLE SIZES:

46", 55"

Specifications:

Free Standing Digital Mirror

With Motion Sensor Activation

UTG's advanced all-in-one LED mirror display is at the forefront of hidden display technology! Establish an engaging visual connection with your customers while adding sophistication and elegance to your retail space instantly. Our unique display transforms from promotional content displays to high quality mirror reflections the moment the motion sensor is activated by someone approaching the stand! Acquire the ability to accentuate your retail brand, product information, current or upcoming promotions and campaigns as you choose. UTG's team can manufacture almost ANY size display - based on your needs - ranging from small mirrors to entire mirrored walls. Our sleek vanity mirror LED display can be installed in nearly any space.

AVAILABLE SIZES:

42", 55"

Bus / Train Displays

UTG's resourceful full colour LED digital signage and displays immediately transform static transportation locations into rich, vibrant venues appealing to every demographic. Our innovative all-in-one digital technology facilitates engagement, entertainment, and enhancement of the commuters' experience with live streaming news/weather/traffic updates, vivid advertisements/promotions, arrival/departure times, and much more. Captive audiences are within your grasp – reach out and connect with them today!

UTG Media Box

Also available from UTG, our discreet digital media boxes to effortlessly connect with your existing screens. Our progressive technology enables the media box to convert existing screens into high-quality digital displays of advertising, video, or messaging streamed through our UTG network. Easily transform any screen into an effective marketing strategy, entertaining video wall, or an engaging presentation.

Indoor / Outdoor Digital Box

UTG's versatile avant-garde indoor/outdoor digital boxes appeal to every demographic, proving extremely beneficial for any business. Our full colour all-in-one LED displays are leading edge multi-purpose digital solutions that enable you to make changes to your digital display instantaneously. You have 100% control over all formatting and content!

No matter the weather, UTG's outdoor digital screens will not be affected. Crafted in an attractive aluminum case with a black polyester powder-coated finish, our outdoor digital boxes are not only waterproof, but can withstand extreme temperatures (hot and cold!) as well. Showcase your marketing strategies in real time, using any format (text, image, flash animation, video and more), with brilliance and charisma on our hassle-free, user-friendly indoor/outdoor digital box.
